c. Penjelasan dari code dan output (korelasi)

File indeks.html itu isinya cuma kerangka halaman doang, kayak nyusun blok-blok dari atas ke bawah. Paling atas ada header yang isinya logo sama tombol Beli, nah tombol Beli itu kalau diklik langsung loncat ke bagian harga yang ada di bawah karena udah diarahin ke sana. Terus di bawahnya ada bagian hero yang isinya tulisan besar "PRESISI DALAM KESUNYIAN" sama kotak kosong buat foto keyboard yang nanti tinggal diganti sendiri. Habis itu langsung masuk ke tabel spesifikasi yang simpel banget, cuma dua kolom, kiri nama speknya kanan nilainya, dipisah garis tipis tiap barisnya. Terus paling bawah sebelum footer ada bagian harga yang backgroundnya hitam, angka harganya gede banget di tengah, ada tombol merah buat beli sama tulisan kecil soal garansi dan ongkir. Nah sekarang file style.css itu yang bikin semua kerangka tadi kelihatan bagus. Dia yang ngatur warna putihnya, merahnya, font judulnya yang gede-gede itu, jarak antar elemen biar nggak berasa sempit, animasi keyboard yang gerak naik turun pelan-pelan, sampai efek tombol yang berubah warna pas di-hover. Jadi kalau file CSS-nya hilang atau nggak nyambung, halamannya bakal jadi teks polos semua nggak ada bentuknya sama sekali, kayak dokumen Word tanpa formatting.
